

TECHNICAL DATA SHEET

IMAGINE

PRODUCT DESCRIPTION

Range of solvent-based stains specifically developed for wood floor staining. Available in colours: Off-White, Ash, Sand, Black, Walnut, Dark Walnut, and Oak.

GENERAL FEATURES

- Provide a uniform color with a wide application margin, without seam marks.
- Application with very low odor, virtually odorless.
- Not classified as flammable or hazardous (see SDS)

CHARACTERISTICS

Viscosity F-4	10 ⁴
Density	1,000-1,410 g/cm ³
Appearance in the container	Fluid liquid.
Stability when unopened	At least 12 months

APPLICATION

Support: Parquet and flooring thoroughly cleaned of contaminants (waxes, grease, etc.), sanded with 150 grit sandpaper or higher. Without scratches or grooves.

Application: Apply the product with a brush or roller, remove excess, and even out the color with a cloth or a polishing machine. After 15 minutes, go over with the polisher to level out any possible defects and homogenize the color. It's important to spread the product well and avoid leaving accumulations, as excessive drying delays can affect adhesion. Let it dry for a minimum of 16 hours (overnight). If accumulations or areas that haven't dried are noticed after this time, mop the area, and let it dry. IMAGINE Blanco Roto: Mix it with 10% Catalyst C-28.

Overcoating: Recommended to be finished with PRIMER PROFESSIONAL + ELITE PROFESSIONAL.

Tool cleaning: Use acetone.
